

### PRICE-LIST FOR WASTE RESEARCH

Prices are valid from 1.03.2020

	Waste research	Price for 1 research, rub.
1	Morphology	900
2	Acute toxicity (2 test objects)	3 000
3	pH	140
4	Ammonium nitrogen, nitrate nitrogen, nitrite nitrogen, sulfates, phosphorus, phosphates, sulfur, chlorides, alkalinity, moisture content, ash content, dry residue, calcined residue (1 index)	400
5	Cadmium, nickel, chromium, copper, zinc, manganese, cobalt, iron, molybdenum, lead, sodium, potassium, calcium, magnesium, aluminum, silicon, vanadium, bismuth, tin, selenium, lithium, tungsten, strontium, antimony (1 index)	400
6	Mercury, arsenic, silver, titanium, yttrium, lanthanum, rubidium, scandium, thallium, tellurium, thorium, uranium, cerium, caesium, bromine, boron, beryllium, barium, thorium (1 index)	550
7	Anionic SSAS, formaldehyde, silicon dioxide (1 index)	600
8	Petroleum products, phenols, chloroform, carbon tetrachloride, cyanides (1 index)	750
9	Benz(a)pyrene, gasoline (1 index)	1 800
10	M-Xylene, O-Xylene, P-Xylene, Styrene (separately and in total)	2 500
11	Methyl chloride, methylene chloride, vinyl chloride, trichloroethylene, 1,2-dichloroethane, 1,1,2-Trichloroethane, vinylidene chloride (1 index)	2 500
12	Benzene, toluene (separately and in total)	2 500
13	Chronic toxicity	18 000
14	Total PCDD (dioxins) and PCDF (furans)	38 900
